Subject: APS Proposal

0000109880

Dear Commissioner,

Please receive this as a request for denial by the Commission of the APS proposal for RETROACTIVE reduction of rebates offered to residential customers who install photovoltaic systems. My family like many others made plans and committed funds to contractors based on the information provided by the APS website which as you know encouraged customers to make these plans and investments. We would suffer real financial harm if a retroactive reduction was approved. We are also concerned about the viability of the nascent solar services industry if it cannot count on a stable playing field. This industry makes so much sense for Arizona; it should be nurtured not put at risk. We understand APS may need to make adjustments to its programs in the larger context of rates approved by the Commission overall. However, this precipitous proposal by APS should be denied.

Sincerely,

John G. Phin

Arizona Corporation Commission

DOCKETED

APR - 7 2010
